

THE ABSORBENT MAT FOR CARGO TRANSPORT

Cargopad is an absorbent mat specifically designed for cargo transport.

It can very quickly absorb any liquid released by the freight such as fresh and frozen foodstuffs, beverages, animal bodily fluids and many others.

Its use **preserves the integrity of the aircraft floor**, preventing damage and corrosion. It also **facilitates cargo hold cleaning operations** and significantly reduces their time.

It consists of a top layer made of airlaid, **Airlgel**, which contains the super-absorbent powder **Spongel** produced by Magic, capable of absorbing and retaining up to 4 litres of liquid per square metre.

A thin film of waterproof PE film on the bottom layer prevents liquids from passing through onto the aircraft floor.

- Colour: white
- Roll dimensions: 180 cm / 120 cm (H) Ø 600 mm or larger
- Absorption capacity: up to 4 L/sqm
- Custom sizes available on request
