

PULPFORM®

Cellulose-based compostable airlaid for dry forming

- CERTIFIED
- SCALABLE
- PROCESS-READY

OK compost

TÜV AUSTRIA
INDUSTRIAL
S1281

PulpForm is a cellulose-based compostable airlaid developed by Magic for dry forming. Designed to be shaped through dry-molding processes, it is intended to produce structured packaging in different shapes and configurations

Main applications

- Beverage
- Food
- Beauty
- Retail
- Pharma
- Packaging

Key advantages

- ✓ **Industrial compostability:** PulpForm is OK compost INDUSTRIAL certified by TÜV Austria, in the configurations covered by the certificate
- ✓ **High strength:** robust, compact and formable structure
- ✓ **Versatile and customisable:** adaptable to different shapes and applications

Dry-molding Technology	VS	Wet-molding Technology
Does not involve forming in water	✓ Water ✗	Involves forming in water
Does not require a drying stage after forming	✓ Energy ✗	Requires a drying stage after forming
Fast production cycles thanks to the dry process	✓ Production ✗	Longer production cycles
